

**Scenario:** You are a middle aged woman/man, single, who just returned from work. You just went grocery shopping, but still cant seem to find anything readily available to eat. You go onto the recipe generator app to start cooking.

**Task One:** Open the recipe app and start scanning the ingredients you possess in your fridge and pantry. Set your desired time limit and filters, then pick the recipe with the best reviews.

**Task Two:** Open the recipe app and do a manual enter of ingredients. Make sure the ingredients entered are correct. Select a recipe and view its information.

**Task Three:** Open the recipe app and select either manual or scan. Go to the desired recipe. Save recipe for a later use and leave a review.

**Improve:**

- Add a better way to finish the scanning function
- Improve the manual entry mode to auto fill
- Add a way to go back on every page

**Keep:**

- Keep the button to begin scanning
- Easy way to navigate by swiping
- Easy to leave a review
